**LEED Platinum**  
**Net Zero Energy**

**Location:** San Diego, CA  
**Size:** 24,000 sq .ft.

**Technologies:** Ciralight

**Team:**  
PlanetReuse  
iD Studios

Swinerton's renovation project goals included a creative and energetic work environment in a net zero energy consumption building. Sustainability Matters strategies included daylighting seeping into the office through an innovative GPS sun tracking system to illuminate daytime work spaces. Reuse materials were integrated into the design with locally sourced reclaimed wood as feature walls, display backdrops and office space dividers.

Phase 2 of this project was completed in early 2015, with additional daylighting technologies to offset fixture produced illumination , maximizing the net zero impact.

Please contact Sustainability Matters® for more information on how to incorporate more sustainable strategies into your building.
